ABOUT COMPANY

The enterprise “ECOPROMLIT PLANT” Ltd., founded in 2018, is currently one of the leading enterprises producing cast iron and steel castings using Lost Foam technology.

The plant’s technical equipment and personnel qualifications make it possible to produce castings of high level complexity for use in hydraulic systems, agricultural engineering, automobile industry and carriage building. The entire process of casting manufacturing is fast and environmentally friendly. ECOPROMLIT Plant Ltd (Melitopol, Ukraine) is a modern foundry company in Company Group Turbocom which specializes in manufacturing cast iron and steel castings using gasification casting methods (Lost Foam).

Ecopromlit

TRUSTED QUALITY OF OUR PRODUCTS

Quality and price

At each stage of production, we comply strictly with all safety rules and follow quality standards and National State Standards. The plant has an efficient service for incoming inspection of all raw materials (polystyrene foam, antipenetration coating components, incoming inspection of melting stock materials). ECOPROMLIT Plant has its own certified laboratory.

We are also ready to work on the project you have provided: we will develop drawings and design a mold according to gasified models. We are ready to offer you not only high quality products, but also a flexible pricing policy. You can place orders on mutually beneficial conditions.

The production capacities of ECOPROMLIT Plant allow to ship more than 200 tons of cast sections per month.

SALES GEOGRAPHY

Ukraine, Russia, Belarus, Kazakhstan, Uzbekistan, Turkey,
Czech Republic, Germany, Bulgaria.

TARGET MARKETS

- **Casting for hydraulics:** body parts for pumps and distribution valves
- **Casting for agricultural machinery:** body parts, seeder components, holders, coulters, cranks, heels, hubs, brackets
- **Railway castings:** locomotive and carriage brake pads, suspension, anchor, monoregulator, wedge, crane, adapter, housings
- **Car castings (moldings):** brake discs plates and brake wheels, body parts of hydraulic systems and transmissions
- **A wide range of plumbing:** gate valves, sliding valves, ball (spherical) valves, valves, mixing valves, shut-off valves, covers, filters, hydrants, meters
